Technology Executive | Infrastructure & Network Operations & Enterprise AI Governance

Accomplished leader with 20+ years of experience building and sustaining mission-critical technology landscapes for global organizations. A "Tech Monk" leader specializing in **Institutional Resilience**, dedicated to maintaining **99.9% system availability** through disciplined SRE, NOC management, and long-range infrastructure planning. Expert in modernizing data centers, telephony, and directory services while leading high-performing, cross-functional teams. Committed to the "Paved Road" philosophy - ensuring that secure, reliable networking serves as an invisible catalyst for organizational excellence and stakeholder success.

CORE COMPETENCIES

Infrastructure & Networking: Enterprise Data Center Design, NOC Operations, Active Directory & Protocols, Telephony/VoIP, Hybrid Cloud (AWS/Azure/GCP).
Operational Excellence: Disaster Recovery/BCP, High-Availability (99.9% uptime), Incident & Change Management (HPSM), Service Performance Optimization.
Strategic Leadership: Long-range Planning, Budget Stewardship ($50M+), Manager Mentorship & Development, Vendor Governance.
Physical & Digital Security: Facilities Technology, Access Control Systems, ISO27001/CMMC Compliance, Security System Integration.

PROFESSIONAL EXPERIENCE

GARTNER | Arlington, Virginia

IT - Senior Director/VP, Enterprise Architecture and Operations 2019 - Current

Executive leader for enterprise technology strategy, AI governance, and operational execution across member-facing platforms and internal business services. Acted as Gartner Subject Matter Expert/Analyst for Public, Private and Gov Clients.

- **Strategic Planning:** Collaborate with executive leadership (CIO/CTO) to develop 5-year technology roadmaps, aligning infrastructure design with long-term organizational goals.
- **Operational Reliability:** Oversee a mission-critical infrastructure environment, maintaining 99.9% uptime for platforms serving thousands of global users.
- **Infrastructure Modernization:** Lead the design and deployment of enterprise-scale data center and server architectures, optimizing for scalability and high-performance middleware integration.
- **Budget & Resource Stewardship:** Manage a $25M+ annual operational and capital budget, focusing on cost-efficiency and ROI for large-scale technology investments.
- **Leadership Development:** Manage and mentor a team of 10+ managers and professional staff, establishing a culture of "High-Support/High-Accountability" and professional growth.

Enterprise Chief Principal Architect | 2016 – 2019

- **Network & Cloud Architecture:** Spearheaded the transition to a hybrid-cloud environment (AWS/Azure/GCP), ensuring secure and reliable connectivity across global sites.
- **System Integrity:** Directed the integration of disparate IT infrastructures during global M&A activities, standardizing directory services and network protocols to ensure operational continuity.
- **Compliance & Risk:** Improved institutional security posture by implementing ISO27001 and CMMC frameworks, bridging the gap between physical facility security and digital asset protection.

EARLIER PROFESSIONAL CAREER

THOMSON REUTERS | Release and Configuration Manager

FREIGHTLINER LLC | QA – Performance Systems Configuration Manager / Lead
